**For over 30 years Deltatrak has provided customers with world-class supply chain solutions. FlashTrak is a leading real-time cloud service for supply chain visibility, built on modern technology that transforms your supply chain management.**
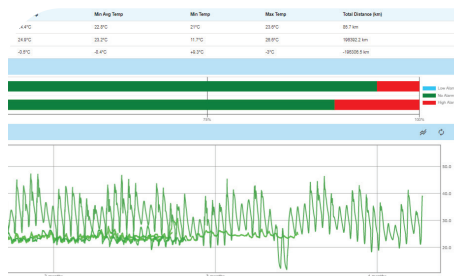

### A Data Driven Decision Engine

FlashTrak collects data from IoT devices in real-time. Advanced features help identify shipment conditions patterns and improves the decision making process at the operational level throughout your supply chain.

### Continuous Improvements

Real-time monitoring provides stakeholders exceptional visibility to know exactly where your cargo is at all times and enables risk management. Real-time data and alerts empower decisions that can reduce product waste and improve ROI.

### Compliance Automation

FlashTrak will scale quickly to meet your business needs, utilizing our expertise in matching the right system components to achieve your compliance and quality management goals with SOP, HACCP, FDA, USDA, GxP and 21 CFR part 11.

## Live Data Visibility

Our advanced IoT loggers record and transmit time, temperature, humidity, light, shock and location data to our secure FlashTrak platform in real time.

## Precision Traceability

Monitor your products throughout the Supply Chain. Tracking location and critical environmental conditions in real-time is critical to identifying the cause of any alerts.

## Benefits of FlashTrak

## Reduce Product Waste

Having access to environmental deviations in real time allows you to respond immediately and take corrective action.

## Business Intelligence & Analytics

Data stored in FlashTrak can be leveraged to provide improved forecasting, performance, and cost controls.

## Building Trust

FlashTrak can be shared with your customers and partners, allowing end-to-end visibility between customers and intermediaries, elevating accountability through transparency.

## All Transportation Modes

FlashTrak is compliant for all modes of transportation: air, road, rail, and sea.

# FlashTrak Services Flow

Global visibility of real-time data reduces product waste, with continuous improvements in efficiency and profitability. Our solutions seamlessly integrate into your supply chain operations.

**Start**
IoT loggers are placed on shipments and in facilities.

**Improvements**
Continuous Supply Chain improvement is achieved.

**FlashTrak**
Cloud service provides real-time access to continuous data anywhere anytime.

**Data**
Online dashboard with summary data. Export data for business intelligence analytics.

**Alerts**
Alerts are immediately sent if excursions occur.

**Arrival**
Inspections and accept/reject processes are more efficient due to planning before arrival.

**Actionable Data**
Immediate corrective actions can be taken based on alert conditions.

**Pre-Arrival**
Cargo condition can be confirmed, disposition determined, and appropriate arrangements can be made prior to arrival.
